

Questions for participants

Section 1: Demographics & Experience

To be completed before starting the programming task.

1. **Current Status:** Are you currently a student or working in the industry?
 2. **Field of Study / Job Title:** What is your major or current role?
 3. **Professional Experience:** How many years of professional experience do you have (including internships or full-time work)?
 4. **LLM Familiarity:** On a scale of 1–5, how frequently do you use AI tools (e.g., ChatGPT, Claude) for coding or software tasks?
 5. **Requirements Engineering (RE) Experience:** Have you taken a course in RE or used formal specifications? If so, are you familiar with **IEEE 29148** or **User Story** structures?
-

Section 2: Post-Task Evaluation

To be completed after receiving the AI-generated code.

1. **Feature Coverage:** Describe the extent to which the AI-generated code implemented the functionality. Were there specific features missing?
2. **Coverage Gaps:** If the code did not cover all requirements, why do you think that happened? (e.g., prompt too vague, AI limitations, misinterpretation)
3. **Coverage Confidence:** What specific evidence in the generated code gives you confidence (or lack thereof) that the requirements were met?
4. **Estimated Coverage:** What percentage of the requirements do you believe were successfully covered by the AI-generated code? (___ %)
5. **Requirement / Vision Impact:** Which specific part of the prompt (or requirement for Group B) was most helpful in guiding the AI to handle the assigned task correctly?
6. **Challenges:**
 - **Intuitive:** Did you find the vision text too broad or unclear for writing an effective AI prompt? Please describe.
 - **REQC-Guided:** Did you encounter difficulties translating the vision into structured requirements? Please describe.
